DAHLIAS

WE TAKE great pleasure in presenting you with our Dahlia catalogue for 1935. We list only novelties, and standard varieties of real merit, based on actual experience and personal observation. Our list does not include all new introductions, but only such varieties that have been selected for their superiority in color, perfection of form, length and stiffness of stem, continuous blooming and keeping qualities. All new introductions are grown from introducer's stock.

OUR STOCK consists of the highest quality field and pot-grown Dahlia roots. They are fully guaranteed true to name and to arrive in good growing condition. We have spared no expense to grow the best roots obtainable. With reasonable care they will produce for the grower a large quantity of high-class flowers.

ROOTS AND GREEN PLANTS will give equally good results, if plants are given immediate care upon arrival. Our plants are all base cuttings; strong, hardy lath house grown stock. Packed by experts in ventilated containers, the plants travel safely on a six-day trip.

WE SUPPLY roots after January 1st; pot-grown plants from May 1st to September. For terms of sale and guarantee, see last page.
